SEPTEMBER 22, 2021

BENJAMIN HILL RELEASES INAUGURAL DRILL PROGRAM TARGETING MOST PROSPECTIVE LOCATIONS ON THE SONORA GOLD PROPERTY.

Vancouver, British Columbia (September 22, 2021) - Benjamin Hill Mining Corp. (CSE: BNN) (OTCBB: BNNHF) (“BHM” or the “Company”) is pleased to announce their inaugural drill program for their never before drilled Sonora Gold property in the Caborca Gold belt of Sonora Mexico. The program consists of 80 strategic drill holes targeting the main mineralized structures in the Caracahui, Caracahui North, Sonora Copper, La Salada and Antenas exploration areas.

The 80 sites were selected based on detailed mapping of mineralized structures and very encouraging surface sample assay results. Drill targets have been prioritized to assess areas where surface samples revealed the highest gold values and in locations that are accessible with minimal road building and ground disturbance (**Figure 1**).

Benjamin Hill plans a phased approach to the drill program to maximize the value of the data collected.

The exploration areas containing the best assays from surface sampling will be the focus of the first round of drilling activity. The drill plan calls to drill four holes of approximately 200m depth per exploration area in each of the Caracahui, Caracahui North, La Salada and Sonora Copper areas. This first phase of the drill program will see approximately 3200m of diamond drilling completed.

The second phase of drilling will consist of an additional four exploratory drill holes per exploration area targeting the most prospective geochemistry.

And finally, a 1000m deep exploration hole is planned in the Caracahui area to test a large geophysical magnetic anomaly and explore for the source of mineralization. The goal of the deep exploration hole is to confirm our mineralization model which is based on the recently completed fluid inclusion study.

Forward Looking Statements

Certain of the statements made and information contained herein may contain forward- looking information within the meaning of applicable Canadian securities laws. Forward-looking information includes, but is not limited to, information concerning the Company's intentions with respect to the development of its mineral properties. Forward-looking information is based on the views, opinions, intentions and estimates of management at the date the information is made, and is based on a number of assumptions and subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated or projected in the forward-looking information (including the actions of other parties who have agreed to do certain things and the approval of certain regulatory bodies). Many of these assumptions are based on factors and events that are not within the control of the Company and there is no assurance they will prove to be correct. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. The Company undertakes no obligation to update forward-looking information if circumstances or management's estimates or opinions should change except as required by applicable securities laws, or to comment on analyses, expectations or statements made by third parties in respect of the Company, its financial or operating results or its securities. The reader is cautioned not to place undue reliance on forward-looking information. We seek safe harbour.
